

A Wake Up Call

From Travis Patron, Leader of the Canadian Nationalist Party (www.nationalist.ca) | 306-700-2193

The following is a leaked document translated from French of a group of senior financiers who met in Canada in 1967 and again in 1985. The document details plans to establish a global government by corrupting the finances, immigration laws, and traditions of nation states. The United Nations plays a central role in forming this global government after the perpetrators of this plan are successful in their suppression of the various nation states.

Note: We are not legitimizing this document, only distributing it for educational purposes.

DOCUMENT: "THE RED DAWN"

The last eighteen years were very profitable for the advancement of our global projects. I can tell you, Brothers, we are now touching it, almost there. The fall of Nation-States is only a matter of time, and that rather short, I can tell you with confidence.

With our undercover agents and our colossal financial resources, unprecedented progress has now been made in all areas of Science and Technology, which we control [through] the largest financial corporations. From the secret meetings with Mr. de Rothchild in year 56, and who had intended to finalize the development and global implementation of the "Computer", it is now possible to envisage the establishment of a kind of "International Highway" where all these machines are interconnected. For as you know, direct control of individual people on the planet would be at least totally impossible without the use of computers and their link electronically with respect to each other in a huge "Network World".

These machines also have the advantage in being able to replace millions of people. Moreover, they have neither conscience nor any moral, which is essential for the success of a project like ours. Above all, these machines do, without question, everything that is dictated to them. They are the perfect slaves that have been dreamed by our predecessors, they who were able to suspect that one day it would be possible to accomplish such a prodigy. These machines without a country, no colour, no religion, no political affiliation and achievement, are the ultimate tool for our New World Order. They are the "Cornerstone"!

The organization of these machines into a vast "Network World", which we will control the levers of, we use to immobilize people. How?

As you know, the basic structure of our New World Order is composed, in essence, of a multitude of "Networks", each covering all different spheres of human activity over the whole of the planet. Until now, all these "Networks" were linked together by a common ideological basis: that of man as the "Centre" and "Ultimate Achievement" of the Universe.

So thanks to all these "Networks", united by the bond of the "New Religion of Man to Man", we have easily infiltrated all human sectors in all Western countries, and changed their "Judeo-Christian" basis. The result is that today, this Man, he is part of the Politics, the Economy, the Social, Education, and the Science of Religion, and has already, since our last meeting at the end of June 67, abandoned his past heritage and replaced it with our ideal of a World Religion based solely on Man. Having cut as well as possible its historical roots, this Man is waiting, finally, to be offered a new ideology. This, properly understood, is ours, that of the "Global Village Community", which will be the "Centre". And that is precisely what we will give him, encouraging him to take part, "Body and Soul", in this "Global Electronic Network" where the borders of nation-states have been forever abolished, wiped out up to their deepest roots.

While this lost man will be absorbed by its blind enthusiasm to be part of its new "Global Community", by being part of this vast "Network of Computers", for our part, we shall see, from the levers above, which will be hidden in the file, and be able to identify, to recognize, the rewards of our own goals.

Because within this "New Global Society", any individual with a potential "Profitability" for us, cannot escape. The constant influx of "Electronic Technology" will make sure all the means to file, identify, and monitor all individuals in populations of the West. For those who do not represent "Exploitable Profitability" by ourselves, we will ensure they are eliminated through all the local civil wars that we have taken care to break out here and there through: the work of our servants; and the "Fall of the Economy" of the Nation-States; and the "Oppositions and Claims" of various groups within those states.

Here is the detail with which we will by 1998 be able to pave the way for the birth of our "World Government":

1. Expand the "Leisure Society" which has been so profitable to date. By using the invention of the "Video" that we've funded, and games attached to it, end up perverting the morals of youth. Offer him the opportunity now to satisfy all his instincts. A being possessed by his senses, and slave of these, we know, will have neither ideal nor the inner strength to defend anything. It is an "individualist" in nature, and is a perfect candidate which we can easily shape to our desires and our priorities. Besides, remember how easily our predecessors were able to turn all German youth at the beginning of the century using the disillusionment of the latter!
2. Encourage "Student Causes" for all cases related to the "Ecology". The mandatory protection of the latter will be a major asset on the day we will have pushed the Nation-States to exchange their "Domestic Debt" for a loss of 33% of all their territories remaining in the wild.
3. Let us fill the inner void of that youth by initiating, from a very young age, the world of computers. Use this as its education system. A slave in the service of another slave we control.
4. On another level, establish "International Free Trade" as a priority for the economic survival of the Nation-States. This new conception will help us accelerate the economic decline of the "Nationalists" of all nations, to isolate the various factions, and in due course, to fiercely oppose each other in wars that will complete the ruin of these nations.
5. To ensure at all costs the success of such an endeavour, let us ensure that our agents, who have infiltrated the Ministries of Intergovernmental Affairs and Immigration of the Nation-States, make major changes to the Statutes of these ministries. These changes will essentially **open the doors of immigration to Western countries with a large mass of immigrants** entering across their frontiers (immigration that we have indeed caused by having taken care to break out here and there, new localised conflicts). Through well-orchestrated press campaigns targeting public opinion in the Nation-States, we provoke them to accept a large influx of refugees which will have the effect of destabilizing the domestic economy, and increasing racial tensions, in their territory. We will ensure that groups of foreign extremists are part of the influx of immigrants, which will facilitate the political, economic, and social, destabilization of the Nations concerned.
6. With "Free Trade", which in reality is not free because it is already controlled by us at the top of the economic hierarchy, infiltrated by the "Trilateral Commission" [that], we will bring discord within the Nation-States by rising unemployment related to restructuring of our Multinationals.
7. Slowly but surely we will move our multinationals into new countries with the idea of a "Market Economy", such as the countries of Eastern Europe, Russia and China, for example. We do not much care, for the moment, if their population has or has not a large pool of new consumers. What interests us, primarily, is to have access to the "Slave Labour" (cheap and non-union) that we offer these countries and the Third World. Moreover, are their governments not put in place by us? Do they not call for foreign aid and loans from our "International Monetary Fund" and our "World Bank"? Such transfers offer many advantages for us. They help to maintain these new populations in the illusion of an "Economic Liberation", and a "Political Liberty" when in reality we shall prevail over their desire for gain with a debt they can never hope to pay. As for Western populations, they will be maintained in the dream of [Economic] because products imported from these countries will not suffer any price increase. But on the contrary, without them noticing at first, more and more industries will be forced to close their doors because of the transfers [of] we have made out of Western countries. These closures will increase unemployment and bring significant losses of revenue for the Nation-States.

8. So we will develop a worldwide "Global Economy" which will completely escape the control of Nation-States. Above all in this new economy, no political or union pressure may have power over her. It will dictate its own "Global Issues" and will require a reorganization of politics, but according to our priorities worldwide.
9. With this "Economic Independence", having as laws only our laws, we will establish a "Culture of Mass Globalism". By controlling international Television, and Media, we will institute a "New Culture", but levelled, uniform for all, without any future "Creation" escaping us. Artists will reflect our future image or will not survive. No more this time will "Independent Cultural Creations" at any time put in jeopardy our globalist projects, as was so often the case in the past.
10. By the same economy ["Par], we will then be able to make use of the military forces of nation states (such as those in the U.S.) in humanitarian aims. In reality, these "forces" we will use to submit recalcitrant countries to our will. Thus the Third World, and others like them, will not be able to escape our willingness to use their people as slave labour.
11. To control the world market, we will divert the productivity of its first goal (to free man from the hardness of work). We shall orientate it to turn it against man by enslaving this last to our economic system where he will have no choice but to become our slave or become a criminal.
12. All these transfers abroad of our multinationals, and reorganizing the global economy, will aim, inter alia, to drive up unemployment in Western countries. This situation will be more feasible because at the beginning we favoured the massive importation of commodities within the Nation-States, and at the same time, we have overloaded those States by overuse of their population in the production of services they cannot pay. These extreme conditions will be multiplied by the millions on welfare bodies of all kinds, illiterate, homeless. etc.
13. With the loss of millions of jobs in the primary sector; caused by the same disguised escape of foreign capital out of the Nation-States, it will be possible to develop the death of social harmony with the spectre of civil war.
14. The international manipulations of governments and peoples of the Nation-States will give us the excuse to use our IMF to push Western governments to implement "Austerity Budgets", under the cover of a reduction of their illusory "National Debt" and the retaining of their hypothetical "International Credit Rating" and the preservation of the impossible "Social Peace".
15. Using those "Budgetary Emergency Budgetary Measures", we will break the financing of the Nation-States for all their "Mega-Projects" which represent a direct threat to our global control of the economy.
16. Besides all these austerity measures will allow us to break the national will in modern structures in the areas of Energy, Agriculture, Transport and New Technologies.
17. These same measures will give us the perfect opportunity to introduce our "Ideology of Economic Competition". This will mean, within the Nation-States, through the voluntary reduction of wages, the voluntary departure with [the], which will open the door to the installation of our "Technology Control". At this time, all departures will be replaced by "Computers" in our service.
18. These social changes will help us to fundamentally change the workforce and the "Police and Military" of the Nation-States. Without arousing suspicion, under the pretext of the necessity of time, we will get rid once and for all of all individuals with a "Judeo-Christian Conscience." In this "Restructuring of the Police Corps and the Military" we will dismiss without challenge the older staff, as well as all elements not carrying forward our globalist principles. These will be replaced by young recruits, lacking "Conscience and Morality", and already all trained, and supporting the reckless use of our "Technology of Networked Electronics".
19. At the same time, and always under the pretext of "budget cuts", we will ensure the transfer of military bases of the Nation-States to the United Nations.
20. To this end, we will work for the reorganization of the "International Mandate of the UN". From "Peace Force" with no decision making power, we shall raise them to become an "Intervention Force" which will, in a while, render the military forces of the Nation-States homogenous. This will allow us to, without fighting, achieve the demilitarisation of all these states so that none of them in the future are sufficiently strong (independent) to challenge our "World Power".
21. To accelerate the transfer process, we will involve the current strength of the United Nations in intractable conflicts. In this way, and with the help of the media that we control, we'll show people the impotence and uselessness of this "Force" in its current form. Frustration helping, and pushed to its climax at the right time, it will push the people of Nation-States to beg international bodies to form such a "Multi-National Force" at the earliest opportunity, to protect at all costs the "Peace".
22. The emergence of the next global commitment to a "Multi-National Military Force" will go hand in hand with the establishment, within the United Nations, of an "Multi-Jurisdictional Intervention Force". Using this combination of "Effective Police and Military", created by the same pretext of increasing political and social instability within these states collapsing under the burden of economic problems, we can better control the western populations. Here, the excessive use of electronic filing and identification of individuals will provide a complete monitoring of all populations.
23. The reorganization of police and military, internal and external, of the Nation-States will converge on the obligation of all to the establishment of a "World Centre of Judiciary". The "Centre" will allow the individual "Police Corps of Nation-States" prompt access to "Databases" on all individuals potentially dangerous to us on the planet. The image of [striving] better judicial efficiency, and more close links created and maintained with the "Military", will help us highlight the need for an "International Tribunal" coupled with a "Global Justice System", one for civil affairs and criminals, and another for Nations.
24. During the growing acceptance by all of these new requirements, it will be imperative for us to earlier complete the global control of firearms within the territories of the Nation-States. To do this, we will accelerate the "ALPHA PLAN" implemented during the 60s by some of our predecessors. This "Plan" originally had two objectives which have remained the same today:
 - a. through the intervention of "crazy shooters" creating a climate of insecurity in people to get them to [support] tighter control of firearms.
 - b. orient violence so as to put the blame on religious extremists, or people with religious affiliations who tend to the "Traditional" or, of persons claiming to have privileged communications with God.

Today, to accelerate the "Control of Firearms," we can use the "Collapse of Economic Conditions" of the Nation-States which will take with it a complete destabilization of the Social [fabric], so increasing violence. I needn't need to remind you or show you, Brothers, the foundations of this "Control" of firearms. Without it, it would become almost impossible for us to make kneel down the populations of those targeted States. Remember how well our predecessors were able to control Germany in 1930 with the new "laws" implemented at the time, laws which are now the foundation of the current laws of Nation-States for the same control.

25. These "Steps" refer to the "OMEGA PHASE" experienced from experiments conducted in the early 70s. They contain the application, globally, of "Electro-Magnetic Weapons." The "Changes of Climate" has caused the:
 - a. destruction of crops, and failure, under these conditions, of agricultural land;
 - b. denaturation, by artificial means, of food products of common consumption;
 - c. the poisoning of nature by an excessive, indiscriminate and widespread use of chemicals in agriculture;

and all this, Brothers, this will lead to certain ruin the food industries of the Nation-States. The future of "Population Control" of these states must go [hand] with the absolute control by us of food production globally, and by taking control of the main "Food Routes" ["Routes] in the world. For this, it is necessary to use the Electro-Magnetic, among others, to destabilize the climates of the States most productive agriculturally. As to the poisoning of nature, it will be speeded up all the more as the increase of populations will push it without restriction.
26. The use of the Electro-Magnetic will cause "Earthquakes" in the most important industrial regions of the Nation-States, to help speed up the "Economic Collapse" of States most threatening to us; as well to amplify the obligation of the establishment of our New World Order [sic,].
27. Who will we suspect? Who could have suspected the use of these means? Those who dare against us by disseminating information about the existence and content of our "conspiracy", will become suspect in the eyes of the authorities of their nation and their people. Thanks to the misinformation, lies, hypocrisy, and individualism, that we have created among the people of the Nation-States, this Man will become an enemy for humans. Thus these "Independent Individuals", who are more dangerous to us precisely because of their "Freedom", will be considered by their peers as enemies, not liberators. Child slavery, the pillaging of the Third World, unemployment, propaganda for the liberalisation of anti-drug laws, the brutalization of the youth of Nations, the ideology of "Respect for Individual Freedom" diffused in Judeo-Christian Churches and within the Nation-States, obscurantism considered as a basis of pride, inter-ethnic conflicts, and our latest achievement: "Budget cuts"; with all that we can finally see the performance of our ancestral "Dream": the introduction of our "NEW WORLD ORDER".
